

Writings

This section contains documents written by Ex-2x2s expressing their viewpoints, studies, thoughts, experiences, poems, letters, etc. They are divided into five categories.

The Child Sexual Molestation (CSA) collection of articles outlines a Biblical method for handling CSA incidents. It presents recommended procedures based on Biblical instruction, command and/or precedent and principles. The primary concern is the CSA victim, as well as justice, healing, restoration, restitution, etc. for them. The actions recommended are considered to be the minimum acceptable response. These actions represent a just and fair procedure that will encourage healing for the Victim and help them to recover emotionally from this atrocity.
